

- Scope 1
 - Direct Emissions: Activities owned or controlled by an organisation that release emissions straight into the atmosphere. Examples of Scope 1 emissions include emissions from combustion in owned or controlled boilers, furnaces, vehicles and emissions from chemical production in owned or controlled process equipment
- Scope 2
 - Indirect emissions from energy: Emissions being released into the atmosphere associated with an organisation's consumption of purchased electricity, heat, steam and cooling. These are indirect emissions that are a consequence of the organisation's activity but which occur at sources which the organisation does not own or control
- Scope 3
 - (Other indirect emissions): Emissions which are a consequence of the organisation's actions, which occur at sources which the organisation does not own or control and which are not classed as scope 2 emissions. Examples of scope 3 emissions are business travel by means not owned or controlled by the organisation such as rail travel, flights, emissions from activities which your company has out-sourced or contracted to others and emissions from the extraction and production of purchased materials and fuels.
